

## Educational Tours

International travel for teachers and students

Dear Parents / Guardians,

As our world becomes increasingly interconnected, it is critical for our students to become more culturally aware and globally-minded. To be able to experience the global classroom first-hand and see what they have been studying in our class come to life, this gives them new perspectives not only of themselves but also the world around them.

We are pleased to announce that your student's Health Science teachers are planning an experiential medically focused tour of **England & Scotland in Summer of 2019**.

This is a unique itinerary that includes real-world immersive activities and locales that apply directly to medical professions with an added international element. This includes access to the London School of Medicine's "Centre of the Cell" research laboratory and a trip to the Old Operating Theatre with a look into medical procedures from 100s of years ago. Students will engage in CSI forensics activities and a nighttime Jack the Ripper tour. They will also be able to experience all of the normal sights of England and Scotland, including riding on the London Eye and a theatre performance in the West End.

Your student has been given the opportunity to join us on an incredible adventure and opportunity to truly experience Health Sciences. There is limited space on the trip, so I hope you and your student will be able to join us at the upcoming meeting to learn more about this opportunity! This is offered exclusively to our Health Science past, present and future students. This trip and its experiences will set them apart with new skills and understandings.

I sincerely hope you will come by and learn more.

Warm regards,

Chrissy Cope (rm 160) – [ccope1@kleinisd.net](mailto:ccope1@kleinisd.net)
